recognised courses.

L1-LANDSCAPE IRRIGATION INSTALLATION COURSE - 2017

Who is the course aimed at?

Any person responsible for the installation and daily operation and maintenance of landscape irrigation systems.

Course length:

4 days

Which skills will the learner acquire during the course?

After completing the course, the learner will be able to:

- Identify the different system components commonly used in landscape irrigation systems - pipes, fittings, valves, pumps, emitters, filters and controllers
- Describe the functions of the different system components
- Apply the operational principles of the different system components as well as the starting up and switching off of systems
- Apply basic maintenance practices applicable to the different system components
- Install all the typical components of a landscape irrigation system
- Undertake the basic programming of controllers
- The course is not product specific and will include a variety of manufacturers' products.

Course fee (VAT included):

R4 900 (SABI members),
R5 250 (Non members)

Venue:

Johannesburg – English
23 - 26 May 2017

Cape Town – Afr/Eng
